

PRODUCTS FOR DRINKING WATER
OPTIMIZATION

ECAIA

Water is our most important food

SANUSLIFE offers products for optimizing drinking water under the ECAIA brand. Optimization is understood as an improvement of drinking water on several levels. The end result is always an **energetic, clean, alkaline, ionized and antioxidant ECAIA water**.

In terms of taste, it can be described as "smooth" and "drinkable". ECAIA water also has measurable differences to normal tap water. While normal tap water has an average pH value of 6.5 to 7.5 and a positive redox value of +150 to +300 mV, ECAIA water has an average **alkaline pH value** of 7.5 to 9.5 and a **negative redox value** of -50 to -600 mV. In addition, ECAIA water contains increased **free hydrogen**.

Water is life.

3 reasons to optimize drinking water

NO MORE HAULING

With only 2 cartridges, around 600 liters of ECAIA water can be filtered. That is the equivalent of almost three large pallets or 600 bottles that you have to haul from the supermarket to the car, up the stairs and into your home.

SAVES MONEY

With just one replacement cartridge, you can produce ECAIA water in the low euro cent range. Including the fantastic ECAIA features. And cheaper than the water filled in plastic bottles from the supermarket.

PROTECTS THE ENVIRONMENT

Every minute, about 1 million plastic bottles are bought worldwide - over 16,600 bottles / second. Most of these bottles are not recycled. They end up in landfills or in our oceans.

The beauty of water

With the help of water crystal photography, the quality of the ECAIA water from the ECAIA carafe becomes visible.

www.watercrystal.eu

Simple. Near natural.

High quality materials

Special break-proof and food-safe plastics

Digital timer

Digital timer for cartridge change

ECAIA cartridge

All-in-one filter cartridge. Purifies and ionizes the water.

Energizing unit

"energizing plate" deletes bad information that is still present in the water after filtration.

ECAIA carafe

ECAIA carafe is a **mineral water ionizer**. Unlike an electric water ionizer, the carafe **does not require electricity**.

Activated carbon granulate reduces pollutants contained in the water. Special ceramics ionize the water.

The end product is **clean, alkaline, ionized and antioxidant** water. The carafe is extremely affordable to purchase and offers a simple and natural way to produce ECAIA water.

The background of the advertisement features a clear glass carafe with a white top container, positioned centrally. To its right, a glass jug is shown with water splashing out of its spout. In the foreground, several wine glasses are visible, some containing red wine. The overall scene is set against a blue background with bokeh light effects. A dark blue circular badge with white text is located on the left side. A large white circular area on the right contains the main text and product details.

World-
Novelty

ECAIA carafe S + ECAIA glass jug S

ECAIA carafe S is a **mineral water ionizer**, with a top container (**ECAIA container S**) in which up to 3 special filter cartridges can be integrated.

In the essential **ECAIA main cartridge S**, the pollutants contained in drinking water are demonstrably reduced, while special ceramics ionize the water.

Due to the compact design of the top container in combination with the tank container **ECAIA tank S**, the ECAIA carafe S is also suitable as a mobile travel ionizer.

To match the ECAIA carafe S, **SANUSLIFE** recommends the **ECAIA glass jug S**, into which the filtered ECAIA water can flow. The **e-smog protected-plate** from memon® integrated at the bottom additionally protects the ECAIA water from electrosmog.

The beauty of water

With the help of water crystal photography, the quality of the ECAIA water from the ECAIA carafe S becomes visible.

Ideal for the office, at home and on the go

Environmentally friendly

A filter attachment made of high-quality plastic parts and individual filter cartridges for sustainable treatment of drinking water. Matching optional environmentally friendly carafe made of lightweight borosilicate glass.

Ceramic rotary valve

Enables continuously variable regulation of the flow rate. Therefore, the ionization power can also be adjusted individually.

Modular filters for better performance

Using the different cartridges and the possibility to regulate the flow rate, the ionization power can be individually adapted to the respective water qualities to produce the best ECAIA water everywhere.

The result is purified, alkaline, ionized, antioxidant and free hydrogen enriched ECAIA water.

ECAIA main filter S

The main cartridge is essential for the production of ECAIA water. It purifies and ionizes the drinking water.

ECAIA booster filter S

Can be used with water that contains lime and is difficult to ionize, in order to further strengthen the ionization performance.

ECAIA nitrate filter S

Removes nitrate from drinking water.

Travel set

ECAIA container S in combination with ECAIA tank S - compact and light - for every journey.

The ideal drinking set

ECAIA glass

The **drinking glass** made of robust borosilicate glass is thin, light, handy and stylish.

Matching the glass carafe, you have a **wonderful set** that should not be missing in any household.

"e-smog protected-plate" from memon®

Protects ECAIA water from the effects of harmful environmental pollution such as electrosmog and earth radiation.

ECAIA glass jug S

The **handmade glass carafe** is made of robust borosilicate glass and goes with the ECAIA carafe S as a collection container for the ECAIA water. The carafe can also be used for other drinks. ECAIA glass jug S is therefore also **available as a single item**.

Energized. Clean. Ionized.

ECAIA ionizer S

The ECAIA ionizer S is a latest generation **electronic water ionizer**.

Timeless in design and adapted to all types of drinking water. Worldwide.

The ECAIA ionizer S can either be positioned next to the sink or attached to the wall.

In combination with the additional **ECAIA ionizer S faucet**, you can also position the ionizer under the sink and conveniently operate it via the faucet.

Mature technology

Dynamic flow rate display

Allows control of the flow rate and flexible adjustment of the pH value.

Maximum flexibility

Filters installed on the side enable easy filter replacement when wall-mounted.

Mechanical rotary knob

You can also prepare filtered tap water without electricity.

The beauty of water

With the help of water crystal photography, the quality of the ECAIA water from the ECAIA ionizer S becomes visible.

Proven electronics

Alternating current is converted into direct current by means of a transformer. Compared to SMPS systems, this technology is more durable and better for water quality.

Mechanical rotary valve

The rotary valve is made of ceramic, which has a high strength and - in contrast to electric valves - ensures a long service life, especially with water containing lime.

Ionization chamber

The ionization chamber with 7 electrodes made of titanium, galvanically coated with 99.99% pure platinum, guarantees optimal ionization performance.

Double filter technology

Numerous tests and analyses prove the high pollutant reduction achieved by the specially developed 2-stage filter technology.

Assembly view

ECAIA ionizer S faucet

Stylish and minimalist design - for every kitchen. The **ECAIA ionizer S** can be operated via this special water tap when it is positioned under the working surface. The fitting shines with a modern design and also fits into small kitchens due to its size.

Useful additional products

ECAIA nitrate cartridge

Filter cartridge for reducing nitrate from tap water. Compatible with ECAIA ionizer S, ECAIA ionizer and AlkaBest.

ECAIA nitrate resin

Filter medium for environmentally friendly refilling of the ECAIA nitrate cartridge. The content of the refill bag is enough to refill the cartridge 3 times. 1L.

SANUSLIFE ORP METER

Used to measure the ORP value (redox value) of liquids.

Indicator liquid pH value

Used to determine the pH value of ECAIA water and other transparent liquids.

ECAIA+ drops

ECAIA+ drops is a food additive based on water in combination with a small amount of potassium hydroxide, an **acidity regulator** that modifies the acidity of some food products.

The concentrate can be used when the acidity of liquid foods or drinks is higher than desired. A few drops can be enough to reduce the acids in hot and cold food products such as juices, coffee, fruit and herbal infusions.

- ✔ Practical and handy, it fits inside any handbag
- ✔ Simple dosage

Water can do so much more!

And that is exactly what the plus (+) stands for: Practical Accessories based on water.

Coffee retains its fine taste but loses acidity, making it even more agreeable.

Fruit teas become milder, more intensely colored and acquire an even fuller aroma.

Fruit juices can be deacidified perfectly and get even more flavor.

Liquid dishes such as soups and sauces become even more delicate in taste.

Basis for on the go

ECAIA+ allhygienics

ECAIA+ allhygienics is an **antibacterial detergent** in aqueous solution that eliminates bacteria and other microorganisms.

It can be sprayed on or applied with a cloth. Simply spray the desired, already visually clean surface until a thin, slightly moist layer is formed and allow it to react for 60 seconds.

- ✔ Effective action
- ✔ Alcohol-free, dye-free, preservative-free, fragrance-free
- ✔ Non-flammable
- ✔ Dermatologically tested
- ✔ Neutralises bad odours

Effective in action

Practical in use

ECAIA+ refill

5 practical refill bottles to fill with ECAIA+ allhygienics. Ideal for on the go or when traveling.

50ml

ECAIA+ sprayer

Hand sprayer for filling with ECAIA+ allhygienics. Produces a particularly fine and persistent spray mist. Ideal for professional use.

300ml

"What we do today determines what the world will look like tomorrow."

Marie von Ebner-Eschenbach

1% for SANUSPLANET

With every purchase of the products presented here, 1% of the net price goes into the SANUSPLANET Foundation Pool.

Marine and environmentalist Magdalena Gschnitzer makes sure that 100% of these funds go to aid organizations that support fauna and flora, culture and customs, and human rights.

SANUS-CREDIT-Cashback

As on all SANUSLIFE articles, you can also get the SANUSCREDIT-Cashback "Super Bonus 100" on these products.

So a lot of credits that you can later convert into SANUSCOIN – the green voucher – and redeem 1:1 for goods and services at all acceptance points. And every time you pay, a donation is made back to the SANUSPLANET Foundation Pool.

3 Euro for MY WATER BOTTLE

The environmentally friendly MY WATER BOTTLE made of borosilicate glass, e-smog plate, bamboo lid and protective hemp cover is not only great for transporting ECAIA water dry, but also for doing even more good.

Because in addition to the 1% per bottle purchase, an extra 3 euros goes into the SANUSPLANET Foundation Pool.
